

LIFESAVER JERRY CAN 20000UF

Description

LifeSaver Jerry Can 20000UF is a robust and portable water purifier capable of filtering 20,000 litres/ 5,300 US gallons of clean drinking water, removing viruses, bacteria, cysts and parasites instantly. The LifeSaver Jerry Can holds up to 18.5 litres of water at any one time and is designed to support those with a greater demand for clean water such as group expeditions, adventurers embarking on overland travel, families or those setting themselves up for off-grid living.

Filter water for drinking, cooking or even washing, with the addition of the LifeSaver shower attachment. No need for chlorine.

Specifications

The LifeSaver Jerrycan 20000UF is a microbiological water filter that uses ultra filtration technology to filter out viruses, bacteria, cysts and parasites from contaminated water sources. LifeSaver technology filters out bacteria to a minimum of Log 6 (99.9999%), viruses to a minimum of Log 4 (99.99%) and cysts to a minimum of Log 3 (99.9%) as specified by Independent Test House to exceed NSF P248 compliance standards, for virus, bacteria and protozoan cyst reduction by the US Army Public Health Center (MEDCOM)
